SUMMARY

Independent and results-driven Full-Stack JavaScript Developer with 4+ years of experience building scalable, production-ready applications across web and mobile. Skilled in React, React Native, Expo, Next.js, Node.js, Express.js, TypeScript, REST APIs, PostgreSQL, Supabase, Tailwind CSS, NativeWind, authentication, cloud hosting, technical SEO, and performance optimization. Experienced in developing responsive user interfaces, backend services, API integrations, and database-driven applications. Strong ability to take projects from concept to deployment while delivering clean, maintainable, and user-focused solutions.

SKILLS

React Js	Node Js	Next Js	React Native	Typescript	Agentic Coding	Zustand	JavaScript	PostgreSQL	Express Js
AI	Cloud Services	Performance Optimization	Version Control Systems.	Expo Router	SEO	React Query			

EXPERIENCE

1/2025 - 3/2026

Hybrid

Mobile Developer

MSAFIRI AFRICA

- Architected and shipped production-ready React Native and Expo applications for a mobility platform, with cross-platform consistency across iOS and Android.
- Implemented critical user-facing features using TypeScript, React Native/Expo, and NativeWind styling, spanning trip discovery, booking workflows, driver authentication, and in-app messaging. Reduced booking completion time by 32%.
- Designed and optimized Supabase schemas, indexing strategies, and caching layers to support real-time data synchronization and API performance. Engineered authentication systems, state management, and REST API integrations for trip updates, driver verification, and booking workflows.
- Optimized mobile app performance and navigation patterns to reduce user friction in high-traffic flows. Improved app load time by 28% through performance profiling and memory optimization across Android and iOS.
- Participated in the full product lifecycle from development through production deployment, including testing, debugging, and managing staged rollouts across web and native platforms.

11/2023 - 12/2024

On-site

Full Stack Developer

AJ APEX MEDIA

- Software Development and Digital Marketing Agency
- Conducted technical SEO audits and implemented optimizations that improved page load speeds by 30-50% and increased search visibility and indexing performance.
- Managed deployments using serverless architecture (Vercel) and PostgreSQL databases, achieving 99.9% uptime and supporting scalable traffic growth.
- Built responsive, modern user interfaces with Tailwind CSS and Material UI, improving mobile usability and reducing bounce rates by 20%+.
- Integrated RESTful APIs and implemented authentication, business logic, and database schemas (PostgreSQL/NoSQL) to support scalable applications serving thousands of user requests daily.
- Monitored performance metrics and resolved complex frontend and backend issues, reducing critical bugs and improving application performance by 25%.
- Documented systems and communicated technical concepts to stakeholders, accelerating onboarding and reducing support queries by 30%.

01/2022 - 09/2023

Remote

Freelance Front End Developer

Hubstaff

- Developed responsive web applications using React.js, Next.js, Node.js, and Express.js for multiple clients across diverse industries.
- Implemented efficient state management with Redux, improving application performance and user interaction speed by up to 30%.
- Designed modern, conversion-focused interfaces using Tailwind CSS, Material UI, and Shadcn UI, enhancing usability and mobile responsiveness.
- Optimized applications for SEO and performance, improving page load speeds and increasing organic traffic visibility by 20-40%.
- Delivered clean, reusable, and maintainable code, reducing future development time and simplifying feature updates.
- Utilized Git and GitHub for version control, collaboration, and deployment workflows, ensuring smooth project delivery and version tracking.

EDUCATION

09/2016 - 08/2021

Bsc Science

■ **Kisii University**

2016 - 2021

■ **Software Engineering - DevOps**
ALX

Feb 2021 - Feb 2022

■ **React Js Full Course**
UDEMY

March 2022 - June 2022

PROJECTS

EzzyPay

🔗 <https://ezypaylanding.vercel.app>

A mobile payment app built with React Native that streamlines M-Pesa STK Push transactions for businesses. The app enables cashier-led payments from individual devices, tracks transaction status in real time, and records each payment with the cashier's name for accountability. It integrates with the M-Pesa Daraja API for secure payment processing and sends instant confirmations to a shared Telegram channel for easy verification. The backend is built with Node.js and Express, deployed serverlessly on Vercel, and uses PostgreSQL on Neon for reliable transaction storage. The system is optimized for scalability, cost efficiency, and clean user experience.

AjiriFlow

🔗 <https://ajiriflow.com>

An AI-powered hiring and recruitment platform built with Next.js, React, and TypeScript to help HR teams, recruiters, and managers manage candidates more efficiently. The app allows users to create roles, import resumes, rank candidates using AI, and generate interview plans without relying on manual screening. Integrated authentication, database workflows, file uploads, and third-party tools such as Google Drive, Gmail, Outlook, Zoho, and Google Sheets to support a complete hiring workflow. The platform features a clean, responsive UI with role dashboards, candidate statistics, and structured hiring insights, improving recruitment speed and decision-making.

Podcastify

🔗 <https://podcastify-v0.vercel.app/>

A free podcast streaming app built with React, integrating two third-party REST APIs to pull podcast data. The app allows users to listen to episodes without needing to sign up. Implemented state management to handle data flow efficiently and incorporated security best practices. The app features a clean UI built with Material UI and React Router, ensuring smooth navigation and enhanced user experience.

Jobisearch

🔗 <https://jobisearch.vercel.app/>

A job search application built with React and TypeScript that enables users to search for jobs globally, apply, and track their application statistics on a personalized dashboard. Designed with scalability in mind to handle a high volume of job listings and user queries.

Key Technologies: React, TypeScript, Redux, PostgreSQL, Vercel.

ATS Ready

🔗 <https://atsready.pro>

An AI-powered resume enhancement platform built with Next.js, React, and TypeScript to help job seekers create stronger, ATS-friendly applications. The app allows users to build and optimize resumes, generate tailored cover letters, and improve LinkedIn profiles using AI-powered recommendations. Integrated authentication, payment workflows, document generation, and user entitlement logic to support both free and premium features. The platform features a clean, responsive UI with guided resume editing, downloadable outputs, and career-focused optimization tools, improving the overall job application experience.
